10. Any sheep or lamb that exhibits a rectal prolapse at a 4-H activity will be ineligible for the activity and sent home by the Extension Educator, Sheep Superintendent, or other appropriately deemed individual. The following will be used as a guideline to determine occurrence of a rectal prolapse:
"A rectal prolapse is defined as an inversion of the rectum that protrudes 4 cm (1.6 in.) or more outside the body and remains exterior to the body while the animal is standing."
If a lamb is observed with a rectal prolapse (by one of the above people) and in the future is not observed with a rectal prolapse, it is still classified as having a rectal prolapse. This was the criteria used in the 2003 multi-year study published in the Journal of Animal Science that established a scientific link between tail length and the incidence of rectal prolapses in lambs fed concentrate diets.
11. Registration, ownership and vet papers will be checked by show committee on show day. Please have all appropriate forms available. Breed association will also be checked.
